KABISH S

Software Developer | Frontend Developer

Coimbatore, Tamil Nadu | +919150617734 | kabishvimala@gmail.com | github.com/kabishS | linkedin.com/in/kabish

PROFESSIONAL SUMMARY

Motivated B.Tech Information Technology student with a strong foundation in HTML, CSS, Bootstrap, JavaScript, Java, MySQL, Git, and GitHub. Experienced in developing responsive web applications and integrating REST APIs. Passionate about software development and eager to apply my technical skills while continuously learning and contributing in a dynamic development environment.

TECHNICAL SKILLS

Languages: Java, Python, HTML5, CSS3, JavaScript

Frameworks & Libraries: Bootstrap, REST API Integration

Tools & Platforms: Git, GitHub, AI Tools (ChatGPT, Claude, Gemini)

Core Skills: Responsive Web Design, API Integration, Object-Oriented Programming

INTERNSHIP EXPERIENCE

Software Development Intern — Rapha Seven, Remote **Jun 2026 – Sep 2026**

- Performed manual and automation testing of web applications using Playwright, designing and executing test cases to identify functional, UI, and usability defects across the SDLC/STLC.
- Conducted regression testing and defect tracking in collaboration with developers, maintaining test documentation including test cases, reports, and defect logs to improve release quality.

Full Stack Development Intern — Thiranex, Remote **Jun 2026 – Jul 2026**

- Built four full stack applications (Portfolio Website, Task Management System, E-Commerce Application, Blog Platform) covering frontend, backend, database integration, authentication, and REST APIs.
- Implemented end-to-end CRUD functionality and participated in the complete SDLC — development, testing, debugging, and deployment — strengthening full stack and API integration skills.

PROJECTS

InboxFlow — AI-Powered Smart Email & Productivity Assistant

Tech Stack: *Node.js, Express.js, Groq AI, Gmail API, Supabase/PostgreSQL, JavaScript*

- Developed an AI-powered email assistant that analyzes emails and converts them into actionable tasks and productivity insights.
- Integrated Gmail API for email access and Groq AI for intelligent email analysis, summarization, and prioritization.
- Designed a backend using Node.js and Express.js, with Supabase/PostgreSQL for data management.
- Built the project as a hackathon solution focused on reducing email overload and improving productivity.

Intervexa-AI — AI Interview & Career Preparation Platform

Tech Stack: *HTML, CSS, JavaScript, Groq API, LocalStorage, REST APIs*

- Developed an AI-powered interview preparation platform combining aptitude, coding, AI interview, job search, and profile analysis modules.
- Integrated the Groq API to generate AI-powered interview questions and responses.
- Implemented coding and aptitude assessments with score tracking and a personalized profile dashboard.
- Added job-search functionality and application-history tracking using browser-based LocalStorage.
- Built a responsive frontend focused on providing an end-to-end career preparation experience.

EDUCATION

B.Tech – Information Technology, VSB College of Engineering Technical Campus, Coimbatore — CGPA: 7.4

Higher Secondary – Computer Science, SBV Matric Hr Sec School — 64.1%

CERTIFICATIONS & ACHIEVEMENTS

- Google Cloud Arcade 2025 (Silver League) – Google Cloud Skills Boost
- AI Prompt Engineering – Udemy
- Java Programming – Scaler
- Introduction to Front-End Development – Coursera
